

1. The horn sharks, round rays, and shovelnose guitarfish that you observed in the video all live in the *benthic zone* of the ocean. This is considered their *habitat*, or *home*. The *benthic zone* is at the *bottom* of the ocean. Draw a picture of a horn shark in its habitat.
 - a. What other animals live in the same habitat as the horn shark? Add those animals to your drawing.
 - b. What do horn sharks like to eat? Add those animals to your drawing.

2. Not all sharks are the same. Name and draw a different shark that you have heard of or seen. Write down three things that make it different than a horn shark.

3. What is a question you have about horn sharks or rays? Write it down.
 - a. What are three things you would do to help you get the answer to this question?
 - 1.
 - 2.
 - 3.
