

Explore  
**life** below  
the surface.

Ocean  Institute

Hear sounds like never before with sonar of the deep.

### **Whale and Marine Life Tour**

Discover and learn about marine life both large and small while cruising the ocean. Whales, dolphins or sea turtles – get an underwater or above water view of these amazing species. Learn from our marine biologists about how animals exhibit natural behaviors in the wild.

### **Bioluminescence Night Cruise**

Explore the nocturnal world of marine birds, sea lions, and bioluminescent plankton. A meter net is deployed 600 feet deep to capture thousands of these drifting organisms which have the ability to make their own light. Also, witness the food chain under our deployed squid light—from the tiniest of plankton, to fish and squid—and at times the sea lions and dolphin who feed on them!
